We are contributing to the SDGs

01 School

- Smart Classroom
- Restroom for girls
- Colourful Campus
- Renovation Works
- Urban Dense Forest
- Table and chairs
- Sports Day

SCHOOL – QUALITY EDUCATION

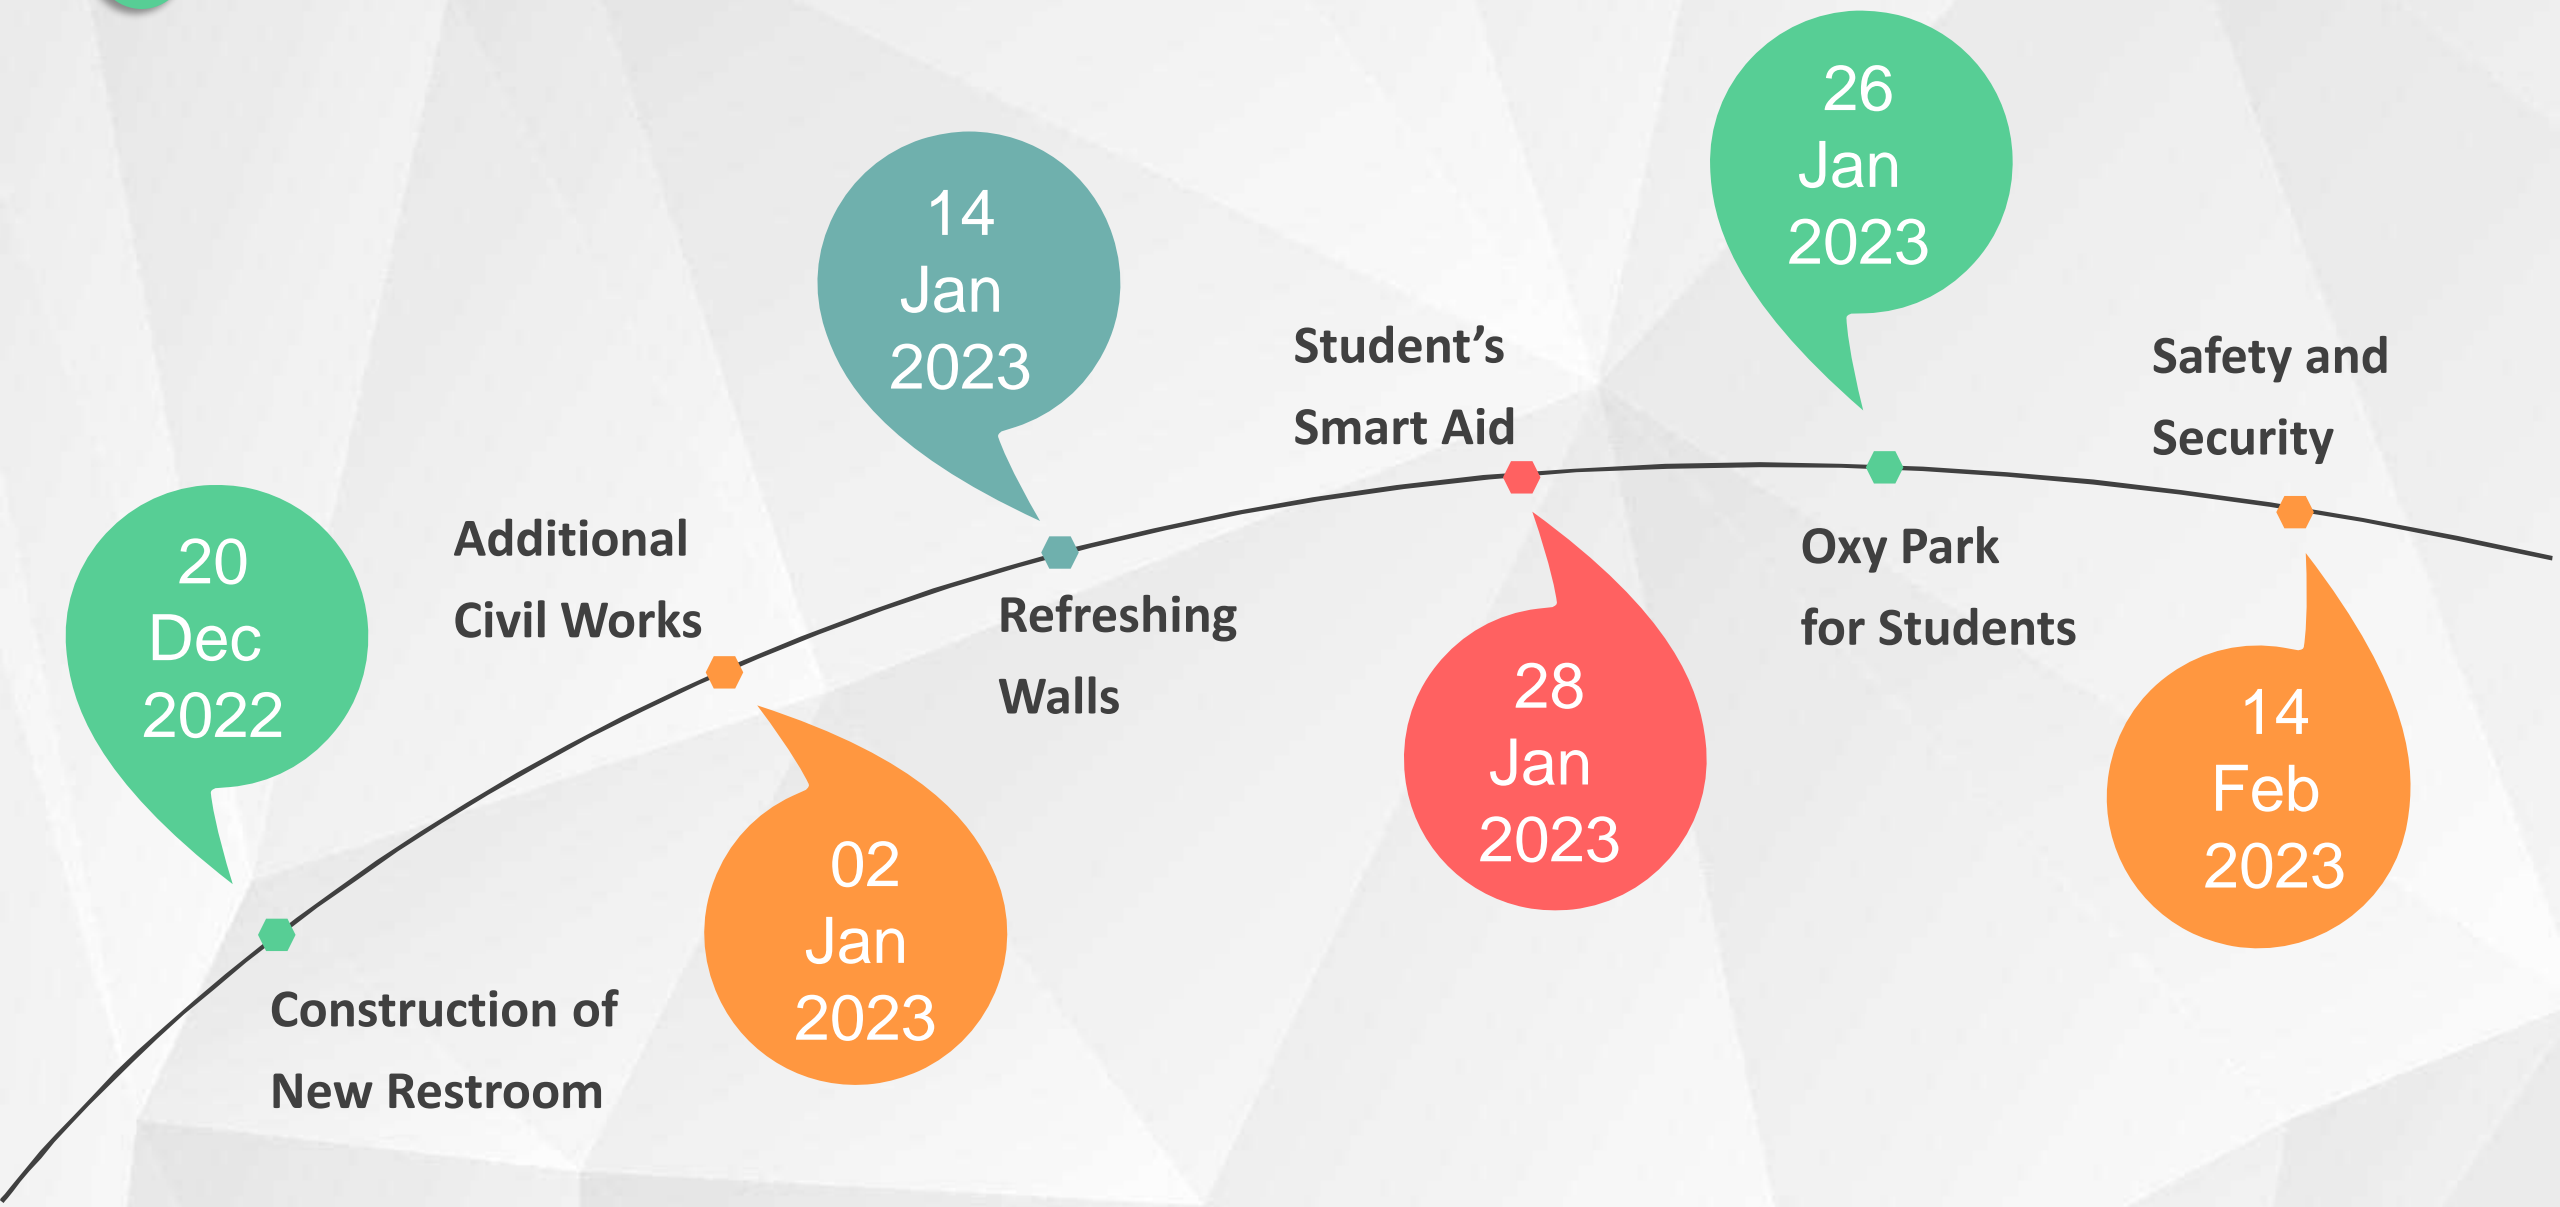

Prologue

Karapakkam, a suburb of Greater Chennai (population: 4,500), is home to a number of BPO and IT/ITES firms. It has a government high school, which was built in 2006. The lack of basic infrastructure in government schools impedes the quality of education in a student's school life, hence it is critical to fix this.

ExNoRa International Foundation, with the help of PayPal, launched an initiative to improve the infrastructure of Government High School, Karapakkam. The activities undertaken include the installation of smart class rooms, the painting of the school's exterior and interior walls, mural painting, better sanitation facilities for students through the installation of toilets, sports activities for all children, and the improvement of the campus's aesthetic and ecological wealth.

SCHOOL

STUDENT'S SMART AID

Enhanced EdTech uptake and usage for improved student learning outcomes through the introduction of a single smart classroom solution (for classes VI to X), which includes all of the essential software tools to conduct interactive classes for students.

STUDENT'S OXY PARK

After plantation, students were made aware of the need of maintaining the plants. Students are serving as green ambassadors, caring for 1,050 plants spread across 50,00 SqFt.

SPORTS DAY

The sports day activity was held with Athletic games. The prize distribution, as well as cultural events such as dancing performances and silambam were held by the students

RESTROOM FOR GIRLS

Constructed New Toilet Building with 2 Indian closet with closed room with PVC Doors, 6 half height Indian Closet With partitioned wall with half PVC counter door, SS Wash basin with 3 taps and steel door at entrance with steps and ramp.

Terrace Waterproofing

Terrace area - cleaning the surface, removal of the dust and other particle, water proofing treatment at top surface

Compound wall renovation

Heightening the compound wall for safety and security of the students from external elements

Colourful Campus

Cleaner and more environmentally friendly surroundings: Painting the school's exterior and interior is done to improve aesthetics and to raise awareness of environmental issues. The students are happier to attend class because of the campus's colour.

Mural painting

PayPal volunteers painted murals on the classroom walls. The volunteers painted motivational messages on the walls for the students, such as how to save water.

SCHOOL

Impact

The Government High School of Karapakkam's teachers and students have benefited greatly from the school's infrastructure development projects. The campus's aesthetic appeal was enhanced by the mural paints and urban forestry. The smart classroom effort resulted in pleased pupils who were strongly inspired to learn more and receive a more comprehensive education. The rest room for girls offered pupils hygienic amenities that support girls' educational possibilities.

Testimonial

“ I am grateful to Paypal and ExNoRa for their immense contribution to the development of the infrastructure here. They have changed the landscape completely and made the campus a lot more attractive and aesthetically appealing. The teaching staff are a lot more happier to come and teach in the school”
