

We are contributing to the SDGs

MAIN POND

SMALL POND

BUSHES

ENTRANCE POND

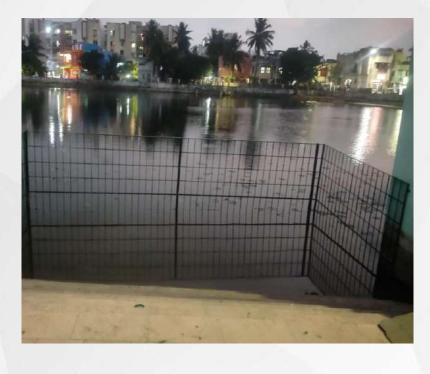

When we first came to Kannagi Nagar and saw the two ponds, it was filled with contaminated water which we found out by testing the water. Also the back side of the pond was filled with bushes. The water bodies were completely polluted environmentally and not in use for the people around.

- Desledgning 8
 Deepening of main pond
- Cleaning & Bund
 Strengthening of small
 pond
- O2 Bird Island & two sides of the bund with Geo textile
- Children's play area with play equipment
- Four sides walkway with strong fencing & benches for sitting
- Entrance Pond cleaning, strengthening the fencing, painting the walls

1 MAIN POND

Desledging, deepening, bund strengthening, bird island, geo textile, stone pitching, walkway and fencing on four sides, benches, tree plantation

Children's play area with play equipment suitable for the young ones in the area, including benches for sitting. Stone pitching and geo textile for the small pond

3 ENTRANCE POND

Cleaning using water ambulance and removal of water hyacinths, strengthening the fencing, painting the fence walls, creating a separate enclosure for people usage of the pond

OUTPUT

Clean ponds which provide clean environment for people who live around it

OUTCOME

Walkways which provide a great lung space to common public who otherwise live in suffocated spaces

BENEFITS

Few thousands of children are benefitted by the children's park
